Comment : Every single person sitting on the ACJ oversight board is responsible for every single death that has happened under your watch. It is horrific and shameful that human lives are being thrown away and none of you have faced any criminal charges for your negligence.

Comment : A family member has been incarcerated at ACJ for the past 3 weeks. During this time, the following occurred. 1. He did not receive his medication for 3 days and when he did it was not the correct dosage. 2. He ordered ~\$50 worth of commissary which he did not receive. Calling the jail for a refund, calls went unanswered, voicemail boxes were full and options to press 5 for caseworkers were not valid. After finally getting in touch with the commissary was told a refund would be applied to the trust fund. That has not occurred. 3. While eating lunch on the pod another inmate found rodent dropping on his lunch tray. 4. The pod was on lockdown all day on 3/4 - 3/5. Basic administration is woefully lacking. When will this improve?
