Comment : What are the actions and changes being made to address the pipe line of drugs and weapons in the Allegheny county jail. Crack rocks and paper with a liquid of mustard gas or K2 known as synthetic weed. A lot of individuals are in deep psychosis and are paranoid and aggressive and many acts of violence and lack of supervision and medicine given 4 hours prior to lock in. Many gang member and violence and correctional officers retaliation to inmates. Basic needs not being met, lack of toilet paper and cover ups. Not enough quality supervision. The inmates who do not care about rehabilitation should be completely separate from the ones who want to be productive members on the outside especially when they exhibit productive actions during stay.

Organization(s): Former inmate

Comment : I've witnessed and been victimized at the ACJ. I can attest to a lot of things wrong and believe, having first hand experience, can make valuable contribution to the oversight board. I would love to be involved.
