Comment : My daughter [REDACTED] was arrested Saturday April 11, 2026. On Sunday April 12th she was transported from the Allegheny county jail to West Penn hospital and admitted to the ICU. She was released by the jail guard who was present Thursday April 16, 2026 and released from the hospital Friday the 17th. The last two days she had her clothes taken and was naked. She was brought in on a warrant and her bond was \$2000.00. She could not post the \$200.00 needed. I'm writing because I or anyone else was not notified that she was in the hospital. She couldn't believe that I was not contacted as I'm her emergency contact. I should have been notified. I realize I could not see her but we could pray and formed a prayer chain. This is not right!

Comment : The current justice system in Allegheny County badly needs a family portal for people in the mental health pod to assure equitable communication, including a place to put current medication lists. Being autistic or in psychosis and thrust into that situation with no contact with your support people is cruel and unusual by any standard.
